

Type 1 Facility Closeout Report

Section A. Facility Data

Facility No. T900C
Facility Descriptor: Office Trailer/ Surface Water Treatment, 384 square feet
Project: RISS, Area 1 D&D
Date of Demolition: February 7, 2002
Additional Information: Sold at auction through PU&D. Utilities were removed to three feet below grade in accordance with site configuration control procedures. A map of utility disconnect locations will be maintained and submitted to the AR on project completion. Site restoration will be performed during the final land configuration for Rocky Flats.
(Must include information on environmental releases and conditions of site at turnover to Environmental Restoration)

Section B. Final Characterization Data

Reconnaissance Level Characterization Report

(concurrence received)

Reconnaissance Level Characterization Report for Buildings 125, 763, and Trailer 900C – Concurrence, Steven H. Gunderson to Joseph A. Legare, dated January 32, 2002, attached.

**RE: Reconnaissance Level Characterization Report (RLCR) for Buildings 125, 763, and trailer 900C
- Concurrence**

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for Buildings 125 and 763, and Trailer 900C, of the Group 10 Closure Project, Revision 0 dated November 14, 2001, which was received on January 10, 2002. Based on the information contained in this RLCR, we are hereby concurring with the Type 1 designation for Buildings 125 & 763, and Trailer 900C.

Although we are concurring with the Type I designation for B125, there remains a concern with the UBC issue identified by ER. The UBC concern, which is identified for mercury, must be resolved prior to demolition, removal, or recycling of the concrete slab. The resolution of this issue may be reached administratively or it may require sampling of the soil and slab. The consultative process should be utilized to resolve this issue.

In addition, although these facilities are identified as Type 1 Facilities, if they are reused prior to demolition or disposal, or if surrounding activities may have generated contamination, additional investigations may be necessary to confirm they have not become contaminated. The consultative process should be utilized to identify the need for acquiring and providing the additional information if needed prior to final disposition of these facilities.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruckek at (303) 692-3328.

Sincerely,

Steven H. Gunderson

RFCA Project Coordinator
